Summary

Recent BSc graduate in Computer Science and Informatics Engineering from ISEL. Built an LLM-agent platform for the Polícia Judiciária and worked on a legacy Java to cloud migration at Accenture. Looking for an AI/ML engineering role, backed by a solid software engineering base in Python, Java and Android.

Education

ISEL - Instituto Superior de Engenharia de Lisboa — Lisbon, Portugal
BSc in Computer Science and Informatics Engineering — *Sep 2022 — June 2026*

Experience

Accenture | *Java, Cloud, Generative AI* — July 2026

- Worked on modernizing legacy Java systems, improving performance and code quality.
- Helped migrate applications to the cloud using forward engineering.
- Used generative AI tools to speed up refactoring and reduce risk during the migration.

Projects

Criminal Case Summarization System | *Python, LLMs, AI Agents, Docker* — Feb 2025 — July 2025

- Built a web platform for the Portuguese Portuguese Criminal Investigation Police that summarizes criminal case documents and drafts the final investigative reports.
- Wrote and iterated on the system prompts for the LLM agents so the output stays formal, consistent and suitable for legal use.
- Used AI agents to read and summarize case files, reducing the manual reading investigators had to do.
- Packaged the system with Docker so it is easy to deploy and fits into the existing documentation workflow.

Rent-a-Car Management System | *Java, JSP, MySQL, JDBC*

- Full-stack web app with role-based access control for five types of users.
- Designed the MySQL schema (7+ entities, foreign keys throughout) covering vehicles, clients and reservations.
- Implemented the rental lifecycle with transactions, plus modules for JSON and XML data exchange.

Zero Waste Tracker App | *Kotlin, Jetpack Compose, MVVM, Firebase Firestore*

- Native Android app in Kotlin with Jetpack Compose and MVVM, keeping UI and business logic separate.
- Real-time sync through Firebase Firestore, using snapshot listeners and Kotlin StateFlow.
- Entry forms with live validation and reusable custom UI components.
- Tracks products by storage location, category, quantity and expiration date, to help reduce household food waste.

Volunteering

Futurália | *Student Ambassador, Lisbon* — March 2026

- Represented the ISEL Computer Science department at Portugal's largest education fair, talking with students and families about the curriculum, projects and student life.

ISEL | *Student Mentor, Lisbon* — Sep 2024 — July 2025

- Mentored incoming engineering students, helping them settle into their first year.

Skills

Languages: Python, Java, Kotlin, SQL, JavaScript, C#, HTML/CSS
AI & Backend: LLM agents, prompt engineering, Docker, REST APIs, Java Servlets/JSP, .NET
Mobile & Data: Android SDK, Jetpack Compose, Firebase, MySQL, Room
Tools: Git, IntelliJ, VS Code, Eclipse, Blender, Unity
Spoken languages: Portuguese (native), English (fluent), Spanish (beginner)
Driving licence: Category B
